Workshop on Gender and Migration

The workshop on Gender and Migration, organised and led by IRMCo, was a follow up on the interviews held with Somali women migrants which were conducted together with Dr. Camille Schmoll in Malta.

The workshop was held at the University of Malta on the 5th November and brought together academics, NGO workers, post-graduate students, Somali women and members of the general public.

In all there were 20 participants and five presentations. Trajectories, perceptions, policy, asylum, Somalia and integration were among the topics tackled in the presentations.

A group discussion followed in which participants shared their views on gender and migration in Malta, with particular focus on Somali women.
